#### 3.5.10 HAZARD ASSESSMENT AND CONTROL DOCUMENT

\*(Please note that selected sections of ICE Policy 3.5.10 are reproduced here. Please refer to the Policy manual for the complete policy).

The Hazard Assessment and Control Document Master (HACD) is a continual evolving document that details all hazards known to the employees of Independent Counselling Enterprises and the controls in place to mitigate them. Employees at all levels of the organization are involved in the creation and updating of this document.

For residential settings the HACD Master is tailored at each site to include a site-based assessment and control information that details the hazards specific to that setting. Community Support Coordinators/Team Coordinators or the appropriate Manager will update the site-based hazard assessment under the following circumstances:

- With the receipt of General and Critical Incident Report indicating employee injuries or near misses
- With the identification of new hazards
- With a change in work procedures
- With the occurrence of renovation/ construction
- With the introduction of new or update to equipment
- Change in support requirements due to client behaviour

In non-residential settings a Hazard Assessment Checklist (as part of the Non -Residential Random Inspection) will be completed by a supervisor, or designate, in each new work site. All employees working in these sites will be provided a copy of the non-residential section of the HACD Master and are responsible for ongoing hazard assessment and reporting new hazards to a supervisor utilizing this information and their "Identify Hazards/Utilize Controls" card distributed at the beginning of non-residential shifts.

A copy of the HACD Master will be available at all sites where more than one employee works, in all Health and Safety Binders, and in every office. All employees are responsible to ensure that the document remains an accurate reflection of the hazards and controls of the agency.

#### Health and Safety Committee Meeting Minutes March 2, 2021 (Minutes edited for publication)

3.1 A) Review of Regional Health and Safety Meeting Minutes – Section 3.2. Completed Incident Investigations for Injury, Health and Property Damage

Edmonton – February 10, 2021- Meeting Minutes: December 15, 2020

COVID-19 outbreak - Client tested positive for COVID-19, subsequently within 2 days of client displaying symptoms the other client and staff tested positive. Incident Investigation Recommendations: Review Behavioral plans for both clients (including Risk Assessment and Positive Approaches Documents); Eye Protection Protocol reviewed with all staff of the program; CRM to conduct supervision meeting with TC to outline steps/ expectations of how changes and agency news affect the program, including items related to employee health and safety will be communicated to the rest of the team; Retrain staff on site regarding all COVID-19 protocols, including cleaning process and Infection Prevention.

**Health and Safety Committee Recommendations:** N/A – no additional recommendations.

#### December 24, 2020

Staff was driving to drop PPE kits off at a program under RMP and was rear ended when they were about to merge onto the street. Staff was taken by ambulance to be assessed for strain to neck at the hospital.

**Incident Investigation Recommendations:** communicate to all programs/ teams that deliveries are to occur during business hours; and review HACD for driving, including controls available for associated risks.

Health and Safety Committee Recommendations: N/A

Calgary –February 5, 2021- Meeting Minutes: No Completed Incidents Investigations to Review (no incident investigations occurred as there were no incidents during this time frame).

Northwest – February 2021- Meeting Minutes:

N/A- Unable to complete HSC Meeting this month as the office is currently under construction. Minutes unavailable at this time.

3.1 B) Review of Regional Health and Safety Meeting Minutes - Section 3.3 Completed Near Miss Investigations

Edmonton – February 10, 2021- Meeting Minutes: June 6, 2020

Staff was going down the stairs to do laundry, stepped on the edge of the stairs and tripped. Appropriate shoes were worn, and staff was holding the handrail. Incident Investigation Recommendations: review with employee the need to adhere to safe work practices while utilizing stairs (i.e., to not rush, pay careful attention on stairs); and review safe work practices when utilizing stairs when at next team meeting.

Health and Safety Committee Recommendations: N/A – no additional recommendations.

Calgary – February 5, 2021- Meeting Minutes: No completed near miss investigations for review Northwest – February 2021- Meeting Minutes: N/A- Unable to New Hazard ID cards have already started to be circulated complete HSC Meeting this month as the office is currently under construction. Minutes unavailable at this time.

3.2 Evaluation of Completed Internal Incident Investigations No Completed Incidents Investigations to Review (no incident This is the time that batteries will need to be replaced in all investigations occurred as there were no incidents during this time frame).

3.3 Evaluation of Completed Near Miss Investigations No Completed Near Miss Investigations to Review (no near miss investigations occurred as there were no miss incidents Ideas for upcoming ICE Page Articles - Stress Busters for cliduring this time frame)

3.4 Health and Safety Committee Inspections

3.4 A) Inspections held as a result of health and safety concerns: No inspections held in February as a result of concerns brought forward.

3.4 B) Inspections completed:

February 2021:

Monthly Safety Inspection Checklists completed: 6 Random Inspections completed: 0 EQA's Completed: 1 at Meadow Lane Program completed February 17/21 by Dasha. Quarterly Office Inspection completed.

3.5 COR Audit Review

ICE is currently completing Policy reviews and recommendations for revisions have been assigned to all regions.

3.6 Hazard Assessment and Control document (H.A.C.D.) Review section (and provide recommendation(s) for changes if needed)

South Committee Reviewed: ICE South has been assigned review of the General Section (Pages 77-115) for the upcoming 2020-2021 meetings.

Policy review 3.5.5- Employee Work Related Injury, Illness and Near Misses

#### **Covid-19 Pandemic Response**

Reviewed most updated COVID restrictions. It is important to remember and to continue to practice all guidelines set out by AHS. Mandatory restrictions still in place in enhanced areas. New variants of COVID-19 currently in Alberta and there is still a strain on our healthcare system, with many hospitalizations and ICU admissions. Please visit https://www.alberta.ca for the most updated information in your area.

Continuous masking in all ICE programs is still in effect. Please ensure you are following the most updated COVID-19 Protocols. Beginning in April 2021, Phase 2 of COVID vaccinations will be split into 4 groups.

4.0 Other Business

4.1 Health and Safety Committee Training Updates: Josphine C. will need to reschedule Hazard Assessment training when it becomes available.

Health & Safety Chairs meeting was held February 11, 2021. Recommendations for Policy section 3.5- Health and Safety requested to be sent in as soon as possible prior to next scheduled meeting. Deadline for all Policy reviews is May 31, 2021.

to staff to replace previous cards. If you have not received one yet please contact your Supervisor to make arrangements.

smoke and carbon monoxide detectors throughout client homes and recorded on the Monthly Safety Inspection Checklists (MSIC's). It is also a good time to check batteries in flashlights and emergency radios.

ents/staff

#### NEXT MEETING DATE: April 6, 2021 at 9am

#### **Referral Incentive Program**

Employees or Support Home Operators who refer a person to ICE who successfully meet our hiring requirements and completes their three month probation with a minimum of 120 hours worked qualify for a \$100 incentive bonus!

#### **Burns /Scalds**

Each year, thousands of Albertans suffer from burn injuries including scalds, flames, sunburn, frostbite, chemical or electrical, most of which are preventable. *A burn is damage to the skin and underlying* 

*tissue.* Children and older adults sustain burns at lower temperatures and in less time than adults. Children, seniors, and the disabled are less likely to survive burn injuries, usually spend longer in hospital, and have more difficulty recovering. Up to 60% of burn injuries happen in or around the home. The vast majority are preventable.

#### **Types of Burns**

• First-degree – affects only the outer layer of the skin. The burn site is red, painful, dry and with no blisters. Long term tissue damage is rare. Generally heals in 3-5 days with no scarring.

· Second-degree – involve damage to the top two layers of the skin. The burn site appears red, blistered, and may be swollen and painful. Generally, heals in 10 - 21 days.

• Third degree – destroy all layers of the skin and may also damage the underlying bones, muscles, and tendons. The burn site appears white or charred. There is no sensation in the area since the nerve endings are destroyed. Skin grafts are required.

#### Burn Causes

 $\cdot$  Tap water scalds – Scalds are the number one cause of burns in Alberta. Scalds result when one or more layers of skin are destroyed by contact with hot liquid or steam. Tap water scalds are 100% preventable. The severity of the injury depends on two things: the temperature to which the skin is exposed and the length of time the skin is exposed to the burning substance.

For hot water to cause 3<sup>rd</sup> degree burns:

- · At 60 degrees C it takes one second
- At 55 degrees C it takes five seconds
- · At 50 degrees C it takes five minutes

 $\cdot$  Flame burns – Burns can be caused from contact with flames or hot objects, or through the inhalation of superheated gases that can damage tissues in the airways and lungs. Flame burns can be caused by clothing catching fire from a stove burner, match, candle, or an open flame.

 $\cdot$  Chemical burns – occur when living tissue is exposed to a reactive chemical substance such as strong acid or base.

 $\cdot$  Electrical burns – occur when an electric current passes through the body

#### Scald Prevention Tips

• Ensure that you are testing the water temperature at the sinks and tubs as per ICE policy 2.3.15 Overall Facility Water Temperature Monitoring and Safe Practices. Overall water

#### facility temperature is not to exceed 49 degrees C.

• If you are providing a bath assist, follow the safe bathing procedures in the home. These include turning the cold water tap on first, ensuring that you agitate the water to evenly disperse tap water as the\_bathtub fills, test the temperature of the water by measuring it with a thermometer and, if it is the correct temperature, by putting your elbow or forearm in the water to double check prior to the client getting in the tub. The water temperature must not exceed 40 degrees Celsius. See Policy 2.3.14 Bath/Shower Safe Water Temperature Monitoring.

 $\cdot$  Avoid flushing toilets, running water, or using the dishwasher or washing machine while anyone is showering to avoid sudden fluctuations in water temperature.

#### **Burn Prevention Tips**

· Carry pots to plates, not plates to pots.

 $\cdot$  Keep all pot handles turned back and away from the stove edge.

- $\cdot$  Check handles on appliances and cooking utensils to ensure that they are secure.
- $\cdot$  When removing lids from hot foods, remember that steam may have accumulated. Lift the lid away from your face and arms.
- · Wear short sleeves or light-fitting clothing while cooking.
- $\cdot$  Always use oven mitts or pot holders when moving pots or hot liquid or food.
- $\cdot$  Heat food in containers or dishes that are safe for microwave use only.
- $\cdot$  Steam builds in covered containers can easily result in burn injuries.

• Puncture plastic wrap or use vented containers to allow steam to escape or wait at least a minute for steam to escape. When removing covers, lift the lid away from your face and arm.

 $\cdot$  Ensure that all chemicals are securely stored away from the furnace.

#### Burn Care

 $\cdot$  Immediately cool the burn with water. Pour cool water on burns or soak them for at least 3 – 5 minutes (30-40 minutes for chemical injury).

 $\cdot$  Never use ointment or butter. This may allow the burn to retain heat.

 $\cdot$  Cover the burn. Apply a soft, clean, dry dressing, bandage, or sheet to the burned area.

· Don't break blisters as this could lead to infection.

 $\cdot$  Seek medical help. If there has been an incident involving you/ your client, ensure that you or your client gets medical attention as soon as possible, including calling 911.

# Prevent the spread of COVID-19 GET THE FACTS

Canada has one of the most robust vaccine approval processes in the world. Any adverse effects have been minimal.

The COVID-19 vaccines meet high national requirements. They are safe and vital.

Seniors are at a higher risk from COVID-19. Vaccines help your immune system and fight off disease.

Covid-19 vaccines are for young and healthy people, too. They can protect you and those around you.

All approved vaccines effectively prevent serious illness and death.

Get vaccinated as soon as you can, no matter what vaccine is provided.

# Prevent the spread of COVID-19 GET THE FACTS

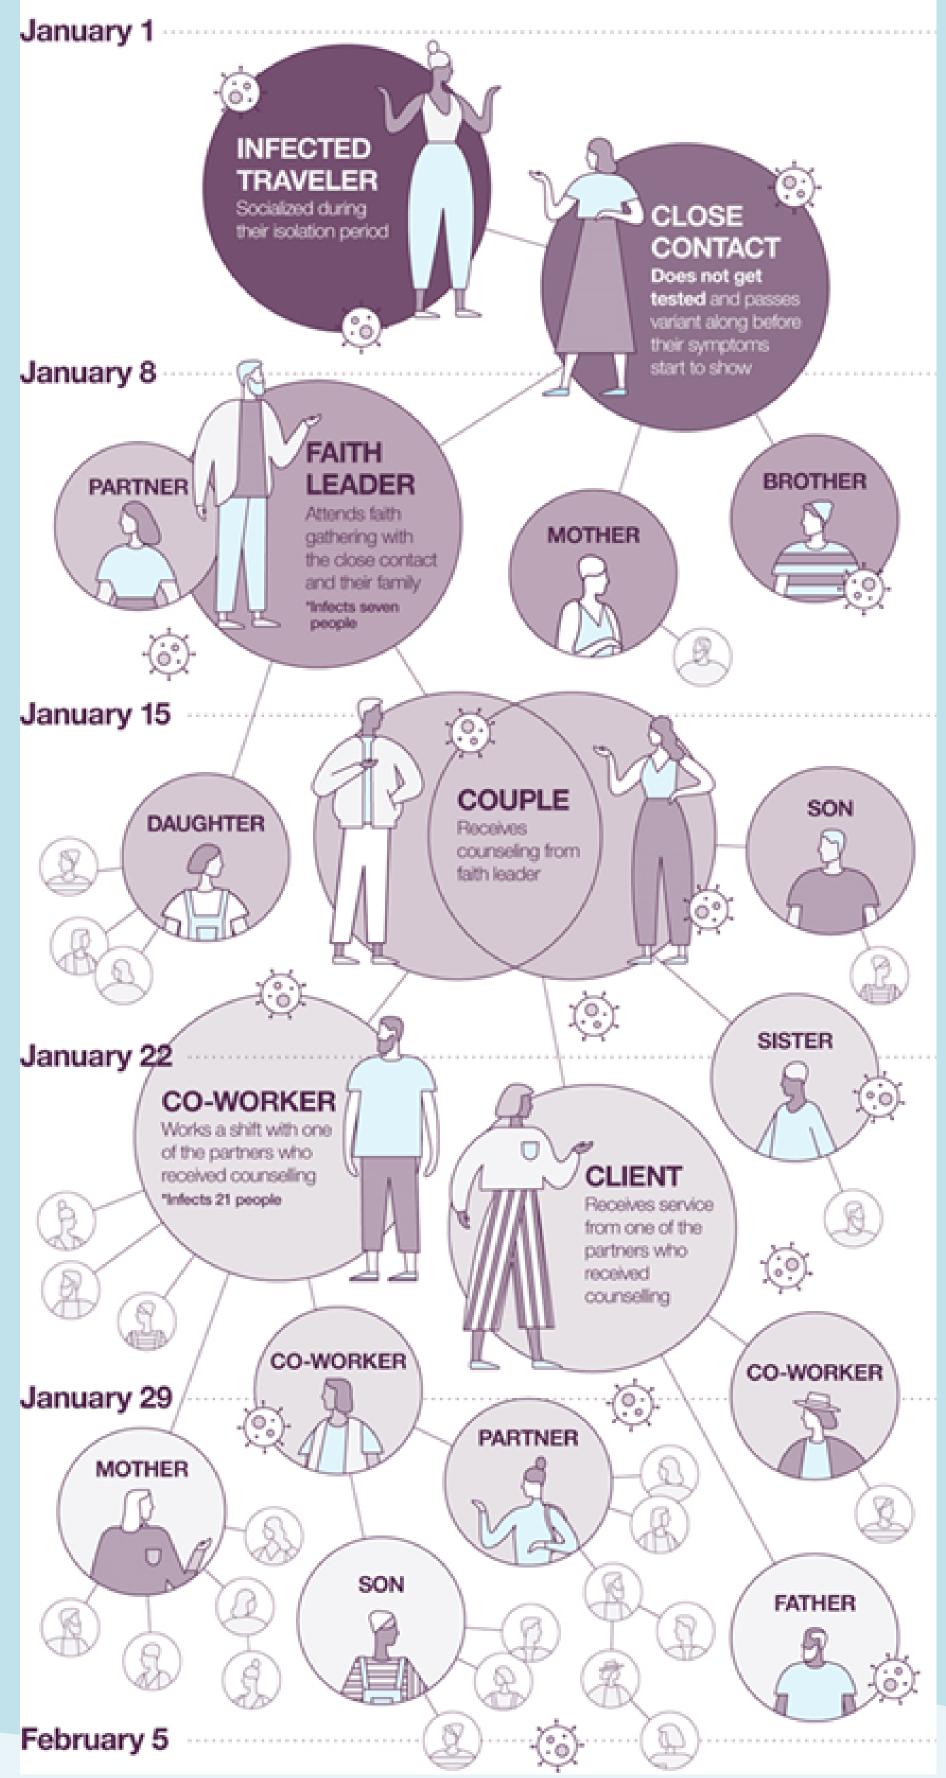

## **COVID 19 Variants of Concern**

Variants are viruses that have changed or mutated while reproducing inside an infected person's cells. The variant can be spread to others and may continue to mutate as it moves from person to person.

New variant strains of COVID-19 were recently identified in the United Kingdom, South Africa, and Brazil, and have since been identified in many other countries around the world. These strains are known as variants of concern, as they appear to spread more easily than other COVID-19 strains.

Alberta is monitoring for these variants of concern. Confirmed variant cases are updated daily.

Symptoms in variant cases are the same as usual COVID-19, including cough, fever, shortness of breath, runny nose, and sore throat. See the full list of symptoms.

How one case turned into 42.

One Albertan returned from travel with a case of a COVID-19 variant of concern. Instead of quarantining alone for 14 days following return from travel outside Canada, the infected traveller socialized with a friend during quarantine. It kicked off a chain of COVID-19 infections that spread far beyond that one case. This is a real case.

Taken from https://www.alberta.ca/covid-19-variants.aspx
